EUROPEAN  
PRODUCT  
DESIGN  
AWARD

KUNLUN, THE PRIMOGENITOR OF ALL MOUNTAINS, THE SPIRITUAL BACKBONE  
OF THE CHINESE NATION.

ITS LOFTINESS STANDS FOR THE HEIGHT OF RELENTLESS PURSUIT;

ITS FORTITUDE SHAPES THE PROFOUNDNESS OF MOUNTAIN-FIRM QUALITY;

ITS CLARITY MIRRORS THE PUREST ASPIRATION OF GUARDIANSHIP;

ITS BOUNDLESSNESS EMBRACES THE VISION OF BRIDGING THE WORLD.

AS LONG AS THE HEART REMAINS, LIFE GOES ON.

WHEREVER THE ROAD EXTENDS, KUNLUN PREVAILS.

The background features a stylized, minimalist illustration of a mountain range in shades of orange and light blue. Above the mountains, there is a celestial body, possibly a planet or moon, with a ring system, also rendered in orange. The overall aesthetic is clean and modern.

# WATCH FOR FREEDOM

# BRAND STORY

WHEEL TO THE WILD, BLEND IN WITH NATURE

In our understanding, a car was once purely an A-to-B tool, a precise fusion of steel, glass and machinery.

More than a decade ago, as our team galloped through the vast national parks of North America and wound along Europe's twisting Alpine roads, we uncovered another possibility: vehicles parked by lakesides, in valleys and among woodlands are no longer mere means of transportation. Tents pitched on rooftops, smoke curling from vehicle tailpipes, and lights sparking laughter in the twilight – the car transforms into a mobile home, the ultimate bridge connecting humans and nature.

This culture and lifestyle, born from the wilderness of Europe and North America, deeply moved and captivated us. We realized that what people yearn for is never escape, but a deeper integration with nature and a more relaxed sense of belonging. From that moment on, IKURAM's mission was defined: to seamlessly weave these globally proven, high-quality mobile lifestyles into the DNA of every vehicle.

Yet this journey is far from a simple "transplantation". We know full well that shoddy retrofits and haphazardly assembled accessories only compromise a vehicle's integrity and aesthetics. True integration must start with the vehicle itself. So we slowed down, focused our efforts, and built on over a decade of hands-on outdoor experience – refining our craft alongside top outdoor enthusiasts and automotive engineers from Europe and North America. We uphold the timeless design philosophy of "Form Follows Function", testing product durability in extreme weather and deliberating countless nights on how to achieve damage-free, native, and integrated connectivity between gear and vehicles. Our pursuit is not to create an extra add-on, but to make IKURAM's products feel like innate components – designed for the vehicle right from the factory, intelligent, efficient and harmonious.

Today, we bring this accumulated expertise and unwavering conviction to China. We are witnessing an unprecedented transformation in China's automotive industry: from "Manufacturing" to "Intelligent Manufacturing", from "Functionality" to "Emotional Resonance", and from "Driving Machines" to "Mobile Living Spaces". This aligns perfectly with IKURAM's philosophy. We believe that for future automotive brands, core competitiveness will lie not only in driving range, computing power or performance, but more importantly in the lifestyles they enable and the emotional bonds they forge.

Beyond the Vehicle, From the Heart.
